Abstract (en)

The present invention provides a header arrangement for a heat exchanger, in particular for a shell and tube heat exchanger, comprising: a sheet, in particular tubesheet, a cover, in particular head cover, configured to be arranged abutting a first side of the sheet and fluidly seal said first side to form a chamber, a structural connection element configured to be connected to the cover and extend through the chamber to structurally support the sheet. Furthermore, the invention provides a method of assembling a header arrangement for a heat exchanger and a heat exchanger.
