Abstract (en)

[origin: WO2023282831A2] An agricultural implement (1) for working soil, over which the agricultural implement travels in a working direction (F), comprises a tool frame (10, 10a, 10b, 10c, 11), a plurality of ground-breaking tools (14a, 14b) of a first tool type which are carried by the tool frame (10a, 10b, 10c, 11) and distributed over a width of the agricultural implement (1), and a pretool (2, 2a, 2b, 2c) which is arranged in front of said ground-breaking tool (14a, 14b) viewed in the working direction. A pretool frame (20) is height-adjustable via a substantially vertical displacement of the pretool frame (20) relative to the tool frame (10, 10a, 10b, 10c, 11).
