Abstract (en)

[origin: WO2023280450A1] The invention relates to improvements in the technical field of brush manufacture. The invention proposes for this purpose, inter alia, a dividing-up device (1), which comprises a dividing-up disc (5) with at least two dividing-up indents (6) formed at its circumference. In order for it to be possible to adapt an effective volume of the dividing-up indents (6) as desired, the dividing-up device (1) comprises an adjusting device (8), by means of which the effective volume of the dividing-up indents (6) that is available for dividing up clusters (2) of bristles is adjusted.
