Abstract (en)

[origin: WO2023280908A1] The present invention relates to a galenic form for oral controlled release of a substance of interest, said galenic form comprising a combination of biodegradable and biocompatible polymer excipients, said combination of polymer excipients comprising at least one denatured or non-denatured protein, at least one polysaccharide and baobab fruit pulp. It also relates to a controlled-release pharmaceutical or food composition based on such a galenic form, and also to a process for preparing such a composition.
