Abstract (en)

[origin: WO2023283060A1] A medical system includes an implantable medical device configured to be positioned within an atrium of a heart. The implantable medical device includes a housing carrying a return electrode, a first leadlet, a second leadlet, and a fixation device. The medical system may be configured to deliver a variety of therapies, including one or more of ventricle-from-atrium cardiac therapy ("VfA therapy"), left bundle branch pacing therapy ("LBB therapy"), or cardiac resynchronization therapy ("CRT
