Abstract (en)
[origin: WO2023281396A2] The invention relates to a sectional door (20) of a vehicle (10) opening as close as possible to the body (11) of said vehicle (10), having cam strikers (30) for closing, locking and opening same, having actuators (15) for opening same and having a movable window (50) capable of separating from said body (11) and translating horizontally along said door (20). These elements are implemented on a door (20) having surfaces with a complex geometry, thus providing a one-piece body (11) having surfaces with a complex geometry, with a single large opening (12) on the side for accessing the front seats (16) and the rear seats (17), and a single large door (20) for closing said opening (12).
