Abstract (en)

[origin: WO2023281390A1] An aeraulic device (1, 1') for radiant ceiling thermal systems (10) of an internal room (100) comprises a case body (2) having an inlet opening (3) and an outlet opening (4) and at least a fan (30), housed internally in said case body (2), configured to move an airflow between said inlet opening (3) and outlet opening (4). Said aeraulic device (1, 1') is configured and suitable to be arranged in an upper volume or plenum (20) of the internal room (100) above the false ceiling (14) of said radiant system (10) and wherein said inlet opening (3) and outlet opening (4) are configured and suitable to be placed in fluid connection with said internal room (100) and said upper volume or plenum (20) in cooperation with at least two openings (18) of the false ceiling (14). The invention also comprises a radiant ceiling thermal system (10) provided with the aeraulic device (1,1').
