Abstract (en)
[origin: WO2023282643A1] The present disclosure relates to a storehouse. In one aspect of the present disclosure, a storehouse may include a first storage space configured to provide a space in which goods are stored within a predetermined temperature or a predetermined temperature range and a second storage space configured to provide a space in which a first heat exchanger is accommodated. The storehouse may include a third storage space configured to provide a space in which a second heat exchanger is accommodated. The storehouse may include a defrost heater provided to be in contact with the first heat exchanger so as to defrost the first heat exchanger by conduction. The second storage space may be fluidly connected to the first storage space.
