Abstract (en)
[origin: WO2023280873A1] The invention relates to a work machine (100) having: a movable mast (1), an ultra-wideband (UWB) system having a UWB tag (2) and a number of UWB anchors (3); a marking device (4) which can be handled by a user and can be actuated by the user, the UWB tag (2) being fastened to the marking device (4); and a control unit (5) which is designed, when the marking device (4) is actuated, to store a position of the UWB tag (2) determined by means of the UWB system at the time of actuation and to control the operation of the mobile work machine (100) according to the determined position.
