Abstract (en)
[origin: WO2023281207A1] Method for generating a predictive computer-generated image of a real scene, comprising:
- one or more steps of acquiring lighting conditions of the real scene, with a view to delivering physical-measurement data related to said real scene,
- one or more steps of processing the physical-measurement data, with a view to delivering physical-characterization information on said real scene,
- one or more steps of predictive simulation, exploiting the physical-characterization information to deliver a realistic three-dimensional predictive simulation of said scene, with a physically based rendering.
