Abstract (en)
A duvet cover for housing an assembly includes a top fabric panel (202) and a bottom fabric panel (204) that together form a flexible fabric envelope for receiving the duvet , wherein head edges of the top fabric panel and the bottom fabric panel are joined together and may form a permanently closed head edge. Side edges (216) of the top fabric panel (202) and the bottom fabric panel (204) and foot edges of the top fabric panel and the bottom fabric panel edges may be equipped with closable fastening devices (208) to engage each other thereby defining at least three closable edges and a composite fabric panel that forms a second end pocket at a foot edge of the bottom fabric panel. The foot edge of the composite fabric panel is joined with the foot edge of the bottom fabric panel securing the duvet in place inside the duvet cover.
