Abstract (en)

Scaffold structure of the type with vertically extending scaffold poles (1), scaffold tubes (2) extending horizontally between opposite sides of the scaffold structure and planks (4) supported by the scaffold tubes and defining a working platform, wherein between the scaffold poles, scaffold tubes and working platform a working space is defined, and a conveyor assembly. The conveyor assembly at least comprises a conveyor rail (5) attached to a part of the scaffold structure and extending substantially horizontally within the working space and a conveyor cart (7) which is embodied to move along the conveyor rail, and which is positioned within the working space, for its major part below the conveyor rail and at a distance above the working platform.
