Abstract (en)

A heat exchanger (HE) includes: a first heat transfer portion (HP1) having a plurality of first heat transfer tubes (T1); and a zeotropic refrigerant flowing through the plurality of first heat transfer tubes (T1) of the first heat transfer portion (HP1). The plurality of first heat transfer tubes (T1) are arranged in a line. The first heat transfer portion (HP1) has the plurality of first heat transfer tubes (T1) arranged to allow flow of the zeotropic refrigerant flowing through the plurality of first heat transfer tubes (T1) to be orthogonal to flow of air flowing across the first heat transfer portion (HP1).
