Abstract (en)
[origin: WO2023285523A1] The present invention relates to a pubic symphysis bone plate (100) for the surgical treatment of damage, in particular fractures or breaks, of the pelvis in the region of the symphysis, that is, the anterior pelvic ring up to and including the acetabulum in the case of suitable fractures. The pubic symphysis bone plate (100) has a plurality of through-openings (110k, 110v, 110z). The present invention also relates to a set which comprises a pubic symphysis bone plate (100) according to the invention and, in addition, at least one cannulated screw or creeping screw (120), preferably made of titanium alloy, preferably anodised, at least one locking screw (130) and/or a target instrument.
