Abstract (en)
[origin: WO2023285698A1] The invention relates to a replaceable ice-skate blade (1) for ice sports. The ice-skate blade (1) contains blade-holding elements (13-1, 13-2) and a steel frame (11). The steel frame (1) has a blade thickness (15) extending between the first (1S) and the second (2S) side face, and extends by a blade length between a first (1E) and a second (2E) end over a front portion, a centre portion and a rear portion, and by a blade height over a lower chord and an upper chord. The steel frame (11) comprises at least one stability element and at least one cut-out (112) formed through the at least one stability element, wherein at least one insertion element is situated in the at least one cut-out.
