Abstract (en)
[origin: WO2023287288A1] Bicycle carrier configured for carrying at least a first bicycle and a second bicycle and configured to be attached to a rear side of a vehicle. The bicycle carrier has a bicycle carrier basic assembly with a first bicycle carrying place and a second bicycle carrying place. Near the front side of the bicycle carrier basic assembly, a column is connected with the bicycle carrier basic assembly. A pivoting arm, by a first end thereof, is pivotably connected with the column and has a first pivoted position in which the pivoting arm is pivoted away so that the first bicycle carrying place and, above it, an imaginary first frame receiving space are freely accessible for placing of the first bicycle, and wherein the pivoting arm has a second pivoted position in which the pivoting arm reaches over the first frame receiving space and hence over the frame of the first bicycle.
