Abstract (en)
[origin: WO2023285146A1] The present invention relates to a porous material (1) comprising porous particles (2) coated with a cross-linked polybenzoxazine (3) having free phenol groups, wherein the polybenzoxazine (3) is a polymer product of a monomer (4) selected from the group consisting of formula I, formula II, and formula III, R1 is as defined herein. Further, the present invention relates to methods of producing said porous material (1) and for uses of said porous material (1) in components (9).
