Abstract (en)

[origin: WO2023286789A1] A method of producing a fermented malt-based liquid having a low ethanol concentration and a pineapple-like fruity flavor, and a fermented malt beverage produced from the fermented malt-based liquid obtained by the production method are provided. That is, the present invention relates to a method of producing a fermented malt-based liquid, including a step of inoculating a yeast of the genus *Cyberlindnera* into a fermentation raw material liquid containing a malt saccharified product and performing aerated fermentation on the fermentation raw material liquid, and a method of producing a fermented malt beverage, in which a fermented malt beverage is produced using the fermented malt-based liquid obtained by the method of producing a fermented malt-based liquid as a raw material.
