Abstract (en)
[origin: WO2023285096A1] The invention relates to an electrical connector, with RJ45 cable connectors, comprising a housing (1) having at least one insertion opening (2), a contact carrier (15), a contact set (18), a closure element (21, 35, 36) which closes the housing (1) on the rear face opposite the insertion opening (2), and at least one feedthrough for at least one electrical contact element (20). The contact set (18) is at least mechanically connected to the closure element (21, 35, 36). The contact elements (20) at the end of the contact set (18) opposite the insertion opening (2) are guided into or onto the rear face of the closure element (21, 35, 36).
