Abstract (en)

[origin: WO2023285755A1] The invention relates to a method for manufacturing a stator (1) for a rotary electrical machine, comprising the following steps: (a) providing a set of electrical conductors (10), in particular in the form of a pin, and a plurality of stacks (5) of metal sheets; (b) inserting said electrical conductors into the stacks of metal sheets (5); and (c) twisting the electrical conductors (10), in particular in one or more directions, so as to cause the stacks of metal sheets to be twisted.
