Abstract (en)
[origin: WO2023001340A1] The invention relates to a compound, to a rubber mixture containing said compound, to a vehicle tire comprising the rubber mixture in at least one component, a process for preparing the compound and to the use of the compound as an aging protection agent and/or antiozonant and/or colorant. The compound according to the invention has the formula (I), in which A is an aromatic radical carrying optionally additional substituents; and in which R1 is selected from the group consisting of xi) aromatic radicals, the aromatic radicals optionally carrying substituents which are selected from the group consisting of halogen radicals, cyano radicals, ester radicals, ketone radicals, ether radicals and thioether radicals, and xii) linear, branched and cyclic aliphatic C1 to C12 radicals, and xiii) combinations of aromatic and aliphatic C1 to C12 radicals.
