Abstract (en)
[origin: WO2023066583A1] The invention relates to a handrail profile (1) for tunnels, e.g. for rail transport or road transport, said profile comprising: a profile body (2) which forms a handrail and which, in its interior enclosed by the profile wall (3), forms a functional channel (4), e.g. a cable channel, characterised in that: the profile body (2) has one or more mounting grooves (7) which are moulded into the profile wall (3), are open to the exterior, and can receive fixing means (9) that can be moved in the profile longitudinal direction; and/or the profile body (2) has one or more lighting grooves (8) which are moulded into the profile wall (3), are open to the exterior, and can receive one or more strip-shaped lighting strips (19).
