Abstract (en)  
[origin: WO2023001334A1] The present invention relates to a motor vehicle lock, in particular a motor vehicle door lock, which is equipped with a locking mechanism (1, 2) consisting essentially of a rotary latch (1) and a pawl (2). Furthermore, at least one electromotive drive (6, 7) is implemented. A control unit (10) and an at least two-part housing (4, 5) having a wet housing part (4) and a dry housing part (5) are also implemented. The drive (6, 7) and the control unit (10) are in each case arranged in the dry housing part (5) and the locking mechanism (1, 2) is arranged in the wet housing part (4). According to the invention, both housing parts (4, 5) are arranged in parallel to each other and are sealingly connected to each other on the edge side.
