Abstract (en)  
[origin: WO2023001737A1] The invention relates to a device (10) for creating lighting of an object (60), comprising at least one strip-shaped projection surface (11) and at least one light element (13) for lighting the projection surface (11). The projection surface (11) is movably arranged, and the device (10) comprises at least one movement unit (28) for moving the projection surface (11). The device (10) also comprises a control unit, the control unit being designed to control the light element (13) in synchrony with a movement of the projection surface (11).
