Abstract (en)
[origin: WO2023012625A1] This invention relates to clip (1) and clip installation apparatus and more particularly, but not exclusively, to a decking board clip for securing decking boards to a support structure and apparatuses for installing decking board clips. The clip comprising a body having an inner part (3) made of a first material and an outer part (4) made of a second material, the body having a first retaining formation and a second retaining formation (8), the first retaining formation being resiliently moveable between an engaged position in which it engages in a groove of a decking board to provide a bias onto part of the groove and a disengaged position wherein it is not engaged inside the groove of the decking board and extends freely from the body, the body also having a receiving formation (5) for receiving a fastener to fasten the clip to a support.
