Abstract (en)

[origin: WO2023006881A1] The invention relates to a detuning device (1) for a string instrument (5) and to a string instrument (5). The detuning device (1) comprises a boundary element (20) and a string clamping device (30). The boundary element (20) and the string clamping device (30) are pivotably mounted independently from each other, in particular on a common axis of rotation (40).
