Abstract (en)

Disclosed are a panel assembly, an air conditioner indoor unit, and an air conditioner. The panel assembly includes a panel, a back plate, a box and a sensor. The back plate and the panel are enclosed to form an accommodation cavity, and the back plate is provided with a first side extending along a length direction of the back plate. The side of the back plate away from the panel is provided with a guide plate facing the first side, and the guide plate is provided with an air guide hole communicating with the accommodation cavity. The box is provided in the accommodation cavity, and an inner cavity of the box is communicated with the air guide hole. The sensor is provided in the inner cavity, and the sensor is configured to detect air entering the inner cavity.
