Abstract (en)  
A method for handling transportation and assembling of a single phase transformer. The single phase transformer is divided into two or more active parts (14). The two or more active parts (14) are transported to a site in at least two separate tanks (10). The single phase transformer is then assembled by connecting the tanks (10) together electrically at the site, wherein the tanks (10) are connected electrically by one or more leads.
