Abstract (en)

[origin: WO2023012304A1] The invention provides an aerosol-generating material comprising: (a) aerosol-former material, (b) a first binder which is guar gum, (c) a second binder which is starch or modified starch, and (d) filler. The invention also provides a method of forming the aerosol-generating material. The invention also provides a consumable for use in a non-combustible aerosol provision device, the consumable comprising an aerosol-generating composition wherein the aerosol generating composition comprises the aerosol-generating material of the invention. The invention also provides a method of generating an aerosol using the non-combustible aerosol provision system and the use of an aerosol-generating composition in a consumable for use with a non-combustible aerosol provision device.
