Abstract (en)
[origin: WO2023012306A1] The invention relates to a device (300) for packaging, conveying and/or dispensing drugs for a user, comprising: - a closed drug container (102) intended to receive at least one drug to be dispensed and comprising a drug-dispensing opening (106) which is intended to be opened when dispensing a drug; and - at least one sensor (110; 114) that is sensitive to at least one physical quantity within the container (102) that may affect the integrity of the at least one drug located in the container (102). It also relates to a drug-dispensing system using such a device.
