Abstract (en)
[origin: WO2023012251A1] The present invention relates to a method for producing antiviral particles, and to the particles as such that can be produced according to the method of the invention. The particles according to the invention are used to remove viruses from water, but also to remove biological contaminants from water and to bind metal-containing ions from solutions. The present invention further relates to a filter cartridge which contains the particles according to the invention.
