Abstract (en)

[origin: WO2023011772A1] The invention relates to a formwork panel (1) having a frame (4) which has a number of longitudinal struts (6) and a number of transverse struts (5), wherein the longitudinal struts (6) and the transverse struts (5) are arranged substantially perpendicularly in relation to one another. At least some of the longitudinal struts (6) and/or of the transverse struts (5) have at least two grooves (7, 8), which run in the longitudinal direction and on opposite side surfaces (9) of the respective longitudinal strut (6) and/or transverse strut (5).
