Abstract (en)

[origin: WO2023017143A1] The present invention concerns an aerosol delivering system (10) for an aerosol generating device (11) and/or a cartridge (12), the aerosol delivering system (10) comprising a main reservoir (31) storing a liquid vaporisable material, a vaporising unit (32) configured to vaporise the vaporisable material and a priming bulb (33) arranged between the main reservoir (31) and the vaporising unit (32). The priming bulb (33) comprising a bulb inlet connected to the main reservoir (31) and a bulb outlet connected to the vaporising unit (32), and being configured, upon its actuating, to expel a predetermined quantity of vaporizable material from the bulb outlet and suck the same quantity of vaporizable material from the bulb inlet.
