Abstract (en)

[origin: WO2023016670A1] Proposed is a method for producing a security feature (11) for a data medium (1), involving the steps of: - providing a molding means having a molding structure (23) of a representation (16) of the security feature (11); - introducing the representation (16) into a substrate (10) by molding the molding structure (23); and - disposing a diffractive or refractive structure (17) on the substrate (10).
