Abstract (en)
The modular façade (2) is made of prefab panels (10) comprising: a frame structure (11) with: horizontal (12, 13) and vertical (15, 16) profiles; the prefab panel (10) further includes an outer cladding (19) attached to the frame structure (11) by attaching means (20). The horizontal (12, 13) and the vertical (14, 15) profiles have a matching shiplap (21) design; A method of mounting the modular façade (2) relies upon the steps of installing brackets (31) to a building structure, for levelling position of the prefab panels (10), and an anti-tipping element (33) in an upper part of the building structure, so that not very demanding lifting means, such as a small crane, suffices, for suspending subsequent adjacent prefab panels (10) from an upper storey (3).
