Abstract (en)
This application discloses a video recording method and apparatus, an electronic device, and a medium. The method includes: in a case that the rollable display includes M recording regions, receiving a first input performed by a user on a target recording region, where the target recording region is at least one of the M recording regions; and in response to the first input, adjusting a recording status corresponding to the target recording region, where M is an integer greater than or equal to 2.
