Abstract (en)  
[origin: WO2023020683A1] Invention relates to a modular training ammunition (1) for a recoilless rifle and a single use charge-module (3) for said modular training ammunition. It comprises a hollow cartridge module (2) with an open front end, closed at the back end of the cartridge module (2) by a charge module (3) comprising a primer capsule (9) and a charge (13). Cartridge module (2) comprises at the back end a flange (4) with positioning incisions (5, 6). The back end of the cartridge module (3) comprises undercuts (7) through said flange (4), where said undercuts (7) are occupied by the radially protruding parts (8) of the charge module (3). The charge module (3) comprises a central bore (10), where both ends (14) and (15) of said bore (10) are flared out and are closed by the covers (11, 12). Between said covers (11, 12) there is a pyrotechnic charge (13).
