Abstract (en)  
[origin: WO2023025632A1] The present invention relates to a device for storing or guiding hydrogen, in particular a hydrogen reservoir or a hydrogen line, wherein the device is designed to have multiple layers from an inner side on the hydrogen side to an outer side, wherein a layer located further inside has a lower diffusion coefficient (D) for hydrogen than the respective next succeeding layer  $D_2 < \dots < D_n$ .
