Abstract (en)

[origin: WO2023025546A1] The present invention relates to a method for producing a vehicle pane (100) which is coated in regions, at least comprising the following method steps: (A) providing a laminated pane (1) with an outer surface (I) and an inner surface (IV) and an encircling side edge, (B) applying at least one mask (11) on at least one region of the outer surface (I) or the inner surface (IV) of the laminated pane (1), (C) applying a metallic coating (5) by means of magnetron sputtering to the outer surface (I), provided with the at least one mask (11), or to the inner surface (IV), provided with the at least one mask (11), of the laminated pane (1), (D) removing the at least one mask (11) and the metallic coating (5) applied to the at least one mask (11) from the outer surface (I) or the inner surface (IV) of the laminated pane (1).
