Abstract (en)

[origin: WO2023025991A1] A support element for supporting a continuous track of a tracked vehicle and an arrangement in a track unit of a tracked vehicle. The support element (20) is an elongated piece fastened, by fasteners, to a track body (15) belonging to a track unit (9) of the tracked vehicle (1) to support the continuous track (10) towards the driving surface. The support element comprises a support plate (17) having several fastening openings (18) and several separate fastening pins (16) which are transversal to the support plate (17) and whose first ends are attachable to the track body (15). The second ends of the pins comprise fasteners to be fastened in the fastening openings of the support plate.
