Abstract (en)

[origin: WO2023027581A1] The invention relates to a filling station (1, 101, 201) for filling a feeder unit (8) with discrete medicaments (9), wherein the filling station (1, 101, 201) comprises a base (2, 102, 202) and a holder (3, 103) that is positionable in one or more inclined orientations (B, C) relative to said base (2, 102, 202) for holding the feeder unit (8) in said one or more inclined orientations (B, C). The invention further relates to a method for filling a feeder unit (8) with discrete medicaments (9) with the use of the aforementioned filling station (1, 101, 201), wherein the method comprises the step of filling the feeder unit (8) with the discrete medicaments (9) when the feeder unit (8) is held by the holder (3, 103) in one of the one or more inclined orientations (B, C).
