Abstract (en)

[origin: WO2023025389A1] Various example embodiments relate to handover in a non-terrestrial network. The apparatus of an intent based network may detect a plurality of user devices to be handed over in a non-terrestrial network comprising a satellite and send a handover command or a conditional handover command to the plurality of user devices. A handover order of the plurality of user devices may be based on moving directions of the plurality of user devices, and the moving directions of the plurality of user devices are against a satellite direction or with the satellite direction. Apparatuses, methods, and computer programs are disclosed.
