Abstract (en)

[origin: WO2023031030A1] The invention relates to a hair treatment device (10), comprising - at least one steam outlet (30) for emitting steam onto the hair, - a system (40) for supplying steam to said at least one steam outlet (30), - at least one detector (50) for detecting contact or proximity of the device with or to the hair, - a steam control unit (59) configured to authorize the supply of steam, and/or to automatically supply steam to the steam outlet (30), by the steam supply system (40) when at least one predefined condition is met, this condition being a hair contact or proximity condition verified from information generated by the contact or proximity detector (50).
