Abstract (en)

[origin: WO2023031784A1] The invention relates to a push button having a nozzle with an upwardly-directed outlet, and also to an assembly consisting of a pump tester (3), a push button (5) and a blotter (21), wherein the push button (5) comprises at least one perfume outlet nozzle (7) which opens onto the upwardly-directed surface (15) of the push button to which pressure is applied to actuate the pump (3), with the aim of preventing skin contact with perfume testers. The push button comprises means for recovering excess liquid and also for reducing the flow rate of the liquid.
