Abstract (en)

[origin: WO2023031868A1] Longitudinal-wire guide (4) for advancing a number of parallel steel wires in a predetermined X direction, having a multiplicity of fittings, consisting of a lower longitudinal-wire-guiding lever (LW-guiding lever) (7), an upper longitudinal-wire-guiding lever (LW-guiding lever) (8), and a compression spring (5) acting between the two, and having a lateral longitudinal-wire guide (LW guide) (10), wherein the fittings are arranged so as to be steplessly displaceable in relation to one another in a Y direction, which is perpendicular to the X direction, and wherein the multiplicity of fittings are arranged on a carriage which can be driven in the X direction.
