Abstract (en)

[origin: WO2023031427A1] The present invention relates to a device (1) for charging batteries of electric vehicles (2). The device according to the invention comprises at least: a main module (22), the main module (22) comprising a power source connection element (16) for coupling to a power source (18), in particular an 11KW or 22KW power connection, and at least a first connection device (10) and a second connection device (11), preferably three, exactly three or at least three connection devices (10, 11, 12), at least the first connection device (10) having a first connection (30) for connecting an electric vehicle (3), and the second connection device (11) having a second connection (31) for connecting a further electric vehicle (4).
