Abstract (en)
[origin: WO2023031849A1] Sheet placing apparatus (100) configured to lay a protective cover sheet (510) over the palletized load (500) comprising movement means (10) suitable for supporting and/or moving the palletized load (500), a picking up and positioning device (20) for the cover sheet (510) and a feeding device (30) comprising a reel assembly (31) configured to rotatably support a reel (520) of film (530) from which a plurality of said sheets (510) can be obtained, by unwinding and cutting the film (530) of said reel (520), characterized in that said reel assembly (31) is configured to be positioned in an operating position (O) below the palletized load (500) along the advancement line of said palletized load (500) by making available an edge (511) of the film (530) which comes out of the movement means (30) to be grasped by the picking and positioning device (20) which lifts said film (530) from below to the top of the palletized load (500).
