Abstract (en)

[origin: EP4163265A1] The invention is directed to the use of certain ethylene vinyl acetals as binders in printing inks. Use of an ethylene vinyl acetal as a binder for the production of a ceramic green sheet or a ceramic moulded body wherein the ethylene vinyl acetal comprises ethylene units in the range of 25 to 60 mol%. A suspension composition comprising one or more inorganic pigments, one or more organic solvents, one or more binders, one or more plasticizers, and one or more dispersing agents, wherein the binder is an ethylene vinyl acetal comprising ethylene units in the range of 25 to 60 mol%.
