Abstract (en)
The present invention provides a method for customizing and assembling an elastic pad for user to sit or lie on. The method comprises: acquiring a top cover body and a bottom cover body; acquiring a desired number and a desired type of elastic module layers and elastic pad layers according to demands for softness and hardness; acquiring a side enclosure according to an overall stacking height dimension of the acquired elastic module layers and elastic pad layers; connecting the top cover body with the side enclosure, and connecting the bottom cover body with the side enclosure, and receiving the selected elastic module layers and elastic pad layers in a receiving space jointly defined by the top cover body, the bottom cover body, and the side enclosure. The elastic pad involved in the method according to the present invention is a high-end elastic pad with higher comfort. The method of the present invention allows a user to selectively replace and select partial structures in the elastic pad, thereby allowing the user to customize and assemble an elastic pad that meets his or her own needs.
