Abstract (en)
[origin: WO2023046245A1] The invention relates to a crawler chain (10) for tracked vehicles, in particular for military tracked vehicles, having multiple track links (1), which are arranged one behind the other in the track direction (K), are connected to one another such that they can pivot, which each have two connecting means (2, 3), wherein at least one connecting means (2, 3) is designed as a tubular pin receptacle (2.1) extending transversely to the chain direction (K) for receiving a connecting pin (8) and wherein at least one tension member winding (4) is provided for transmitting tensile forces from one connecting means (2) to the other connecting means (3).
